

IT Infrastructure Questionnaire

To help us size and design the solution for your environment, please provide the following information about your IT infrastructure.

1. General Information

- Organization Name:
 - Site(s) Covered:
 - Number of Hospitals / Clinics:
 - Annual Imaging Studies (if applicable):
-

2. Hardware & Virtualization

- Do you have an existing virtualization platform? (VMware, Hyper-V, etc.)
 - Number of available physical servers (CPU cores / RAM per server):
 - Do you have a GPU server? (If yes, please specify model and memory):
 - Available backup servers or test/dev environments:
-

3. Storage

- Type of storage available (SAN / NAS / DAS / Object Storage):
 - Total capacity available (TB):
 - Storage tiering (SSD, SAS, NL-SAS, etc.):
 - RAID configuration used:
 - Average free space available for medical imaging workloads:
-

4. Network

- Current LAN bandwidth (1 Gbps / 10 Gbps / other):
 - WAN bandwidth between sites and datacenter:
 - Redundancy setup (dual links, failover mechanisms):
 - DMZ setup available (Yes/No):
-

5. Security

- Firewall type/model:
 - Load balancer available (L4 / L7):
 - VPN / site-to-site encryption in place:
-

6. Software & Licensing

- Existing database licenses (SQL Std/Ent, Oracle, MySQL, etc.):
 - **License type:**
 - **Year/version:**
 - Existing OS licenses (Windows Server, Linux, etc.):
 - **License type:**
 - **Year/version:**
 - Existing hypervisor licenses (VMware vSphere, Hyper-V, etc.):
 - **License type:**
 - **Year/version:**
 - Backup software in use (type + version):
-

7. Integrations

- Existing HIS/RIS (name and version):
 - Supported integration protocols (HL7, DICOM, FHIR, API, etc.):
-

8. Business Continuity

- Do you have a Disaster Recovery (DR) site? (Yes/No)
 - If yes: What resources are available at DR (servers, storage, network)?
 - Backup retention policies (on-site / off-site / cloud):
-

9. Additional Notes

(Any other details that might help us design the solution.)
